

REMARKS

Applicants appreciate the Examiner's allowance of Claims 8-42, 44-50, 52-58, 60, 61, 70-74, 76 and 77.

Applicants will now address the Examiner's remaining objections and rejections in the order in which they appear in the Office Action.

Claim Objections

The Examiner objects to Claims 43, 51, 59, 67 and 75 for informalities therein. As Applicants have made each of the Examiner's suggested amendments, it is respectfully requested that this objection be withdrawn.

Claim Rejections - 35 USC §112

The Examiner also rejects Claims 64, 65 and 73 under 35 USC §112, second paragraph as being indefinite. In order to advance the prosecution of this application, Applicants have amended Claims 64 and 72 to recite that "the first insulating film comprises an organic resin material" and Claims 65 and 73 to recite that "the second insulating film comprises an inorganic insulating material." It is respectfully submitted that this overcomes the Examiner's objections, and it is requested that this rejection be withdrawn.

Double Patenting

The Examiner also rejects Claims 1, 4, 62 and 66 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 6 and 7 of US 6,720,198 (Yamagata et al.). This rejection is respectfully traversed.

While Applicants traverse this rejection, in order to advance the prosecution of this application, Applicants have amended independent Claims 1 and 62 to recite that the anode comprises a transparent conductive film. This was the feature of dependent Claim 2 which the Examiner stated would be allowable if rewritten in independent form. Hence, there is no double patenting, and it is respectfully requested that this rejection be withdrawn.

Conclusion

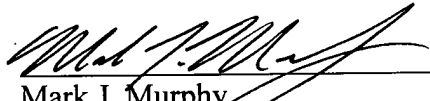

Accordingly, the present application is now in a condition for allowance and should be allowed.

Please charge our Deposit Account No. 50-1039 for any fee for this amendment.

Favorable reconsideration is earnestly solicited.

Respectfully submitted,

Date: *December 1, 2004*
